

**Dr Peter King PhD (PK)**

Further info if needed can be found at:

<http://www.whri.qmul.ac.uk/staff-all/staff-research/198-king-peter>

Peter King graduated from Cambridge University in 1984 with a degree in Biochemistry. He was awarded a PhD by the Imperial Cancer Research Fund (now CRUK) on transcriptional regulation of the human beta interferon gene and joined the Molecular Endocrinology Department in 1997, being appointed to a lectureship in 2001 and a senior lecturer in 2009

His current research interests include:

- Transcriptional regulation of genes in the adrenal cortex
- MC2-R transcriptional regulation during adipocyte differentiation.
- Control of adrenal cortex differentiation and development.
