

Dr Teng-Teng Chung
Physician and Endocrinologist

Dr Teng-Teng Chung graduated in Medicine at the University of Sydney and her higher specialist endocrinology training was undertaken at Barts and the Royal London hospital. She was awarded an MRC Clinical Research Training Fellowship in 2007 and obtained a PhD in molecular endocrinology under Professor Adrian Clark's supervision at Queen Mary University of London, focusing on the ACTH receptor and its naturally occurring mutations. She was appointed as a Walport Clinical Lecturer in Endocrinology at Barts and the London School of Medicine in April 2010 and has currently moved to take up a post as a locum consultant physician at UCLH.

Her research interests include:

- Adrenocortical cancer
- Adrenal physiology
- Growth hormone replacement
- Pituitary diseases
- Endocrinology in critically ill patients
